Description

Compact cooling towel which is manufactured from a 50/50 blend of RPET and polyester. RPET material is produced from recycled PET water bottles and food packaging. RPET fibres completely repel water which evaporates much faster when it contacts them. The towel will cool up to 15 degrees below the outdoor temperature in seconds by harnessing the power of this rapid evaporation. To activate it, wet the towel, wring it out and snap it tight to remove excess water. Wearing it around the neck or head provides natural, chemical-free cooling that will last as long as the towel remains wet. It is ideal for use when playing sports, jogging, walking, biking, at the gym, working outdoors etc. It can also be used as a sports towel and is presented in a drawstring pouch which is manufactured from 90% RPET and 10% PU. An instruction leaflet is included.
