Due to the characteristics of the process, adding woven label or embroidery may increase the time to finalise the pre production sample and the bulk production. Please talk to us before placing your order.

Due to differences in the composition of the materials used in different parts of the sock, i.e. elastic being present in the top band and not on the toe of the sock, there may be slight differences in the pantone colour achieved in the final product.

Due to the nature of the jacquard weave customisation , small details , such as small fonts may not be visible clearly on the finished product. Please keep this in mind with your design.

Due to characteristics of the process, to achieve the best results, we recommend using logos that face the same direction or are separate designs when embroidering logos on socks, as creating symmetrical logos for the left and right foot is prone to screen and requires a longer production lead time.

Designs that utilise specified stock colours, will have the shorter production times. For colours outside of these, there may be additional production time required.
