Description

- 5m retractable metal tape measure
- Metric and Imperial measurements
- Rubber exterior with wrist strap and metal belt clip
- Features 3 different buttons conveniently located to lock the tape measure in place. Four colour process digital decal. Variable-data printing (VDP) (Also known as variable-information printing (VIP) or VI) is a form of digital printing, including on-demand printing, in which elements such as text, graphics and images may be changed from one printed piece to the next, without stopping or slowing down the printing process and using information from a database or external file. For example, a set of labels, each with the same basic layout, can be printed with a different name on each label. Variable data printing is mainly used for direct marketing, customer relationship management, advertising, invoicing and applying addressing on selfmailers, brochures or postcard campaigns. *** No solid colours near or around the edges of the sticker as it will cause the sticker to curl around the edges over time. Digital Label – White label base *** Note : Epoxy Dome service is 15 days.
